Hi Suzanne:

When the PRP authored the Supplemental Feasibility Study (SFS) for the Westlake Landfill, OU-1, EPA did not request a summary. However, a brief summary was prepared later by the PRP under separate cover, but was never approved by EPA.

After discussing this issue with Dan Gravatt, our RPM, it has been determined that the SFS Table 10: Comparative Analysis of Alternatives can serve as a response and summary to the SFS itself.

I have attached a link to the SFS, which is 1,356 pages long. Table 10 is incorporated into pages 297-303 of the document.

EPA, Region 7, believes that Table 10 of the SFS can be used as a document summary in response to any public inquiry that the region or Hqtrs. receives on the Westlake Landfill Superfund Site.

Please let me know if you have questions.

Thanks.

Debbie

I was in a meeting on Monday afternoon with Mathy Stanislaus. He mentioned his trip to Region 7, and mentioned he had heard comments from community members (he didn't say who) regarding the Westlake supplemental feasibility study, and the need for a summary of the study. Has the region decided how it wants to proceed in terms of providing a summary of the study? I know the responsible party prepared a summary. Has the region decided if it is going to prepare an independent summary or if it is going to make the responsible party's summary available to the public?
